

The **FRAC SHACK™** Advantage

With safety & efficiency the primary focus, **Frac Shack™** single handedly introduced advanced *Automated Re-Fueling* technology & equipment to the market.

With the addition of the versatile Bi-Fuel **FracFueller™** & the NG **SideKick™** to the fleet, **Frac Shack** makes it possible to capture, process, & use field gas on-site, offsetting diesel costs and significantly reducing emissions.

Powered by **Energera®**, **Frac Shack**'s innovative technology & sophisticated data analysis optimizes productivity & enables our partners to work smarter, greener, safer, & cleaner.

INSPIRING THE NEW ERA OF ENERGY

ENERGERA MISSION & VISION

GREENER

- Sustainable Operations
- Responsible Development
- Environmental Stewardship
- Reduced Impacts

SMARTER

- Adaptive Technologies
- Agile Solutions
- Enhanced Insights
- Unrivaled Performance

CLEANER

- Optimized Processes
- Efficient Operation
- Simplified Application
- Environmental Controls

SAFER

- People First
- Highest Quality
- Intuitive Functionality
- Unwavering Standards

FRAC SHACK™

an  energera company

CONTACT US: (855) 296-3722

Frac Shack's sophisticated solutions are transitioning the hydraulic fracturing industry from pure diesel to natural gas and bi-fuel spreads, while providing the tools and real-time data that allow for real-time agility.

THE FIRST CHOICE OF FRAC PROVIDERS

The FracFueller and NG SideKick makes utilizing field gas and refueling safer, cleaner, and more efficient. Entirely self-contained and self-sufficient, each unit seamlessly integrates into existing systems for fast and simple transitions.
