## **ENERGERA INC.™ APPOINTS WAYNE CLARKE AS VICE PRESIDENT OPERATIONAL RISK**

**ACHESON** – [Energera Inc.™](#) is pleased to announce the appointment of Wayne Clarke as Vice President Operational Risk. Wayne's career in Health and Safety began in 1997 within the Department of National Defence involving transportation, distribution and management of fuel and services. Wayne is a graduate of the University of New Brunswick's OH&S programs, the University of Alberta and Ivey School of Business Leadership Programs, and holds a Master's Degree in Business Administration from the Alberta School of Business, University of Alberta.

Wayne brings over 30 years of logistical and HSE experience to Energera having managed health, safety, and environmental programs for private industry and larger corporations working in civil construction and the oil and natural gas industry throughout Canada, the United States, as well as parts of Argentina.

Wayne Clarke is being promoted from his prior position as Director, HSE. Wayne's professional integrity and dedication is evident in the relationships built throughout the organization, and with customers. His commitment to continued professional development and leadership fosters a culture of safety and solutions for industry best practices are all qualities highly valued by Energera.

*"Wayne is a true leader in managing operational risk, both within Energera and in the larger world of Health, Safety, and the Environment. His professionalism and attention to detail are second to none. Wayne seeks to understand before he acts and expects nothing less from everyone around him. His high standards set the bar for workers of all kinds and at all levels. We are fortunate to have his influence to keep Energera at the forefront of risk management in our industry."* - **Todd Van Vliet, CEO and Founder of Energera**

The Energera company of brands consists of established, industry leading product lines, distinctive in technology and application, with corresponding services forming the *Energera Advantage*. This includes the most sophisticated sand separator technology on the market in [Sandtinel®](#), the world's first automated refuelling system for hydraulic fracturing, [Frac Shack™](#), and the natural gas distribution and processing system known as the [NG SideKick™](#).

### **ABOUT ENERGERA | Changing the World of Energy™**

Beginning in 2011 with Frac Shack and following the acquisition of Sandtinel in 2020, Energera was created in 2021 recognizing the need for powerful and impactful enertech solutions. Energera stands as an industry leader for change enabling energy development that is **smarter**, **greener**, **safer**, and **cleaner**, charting a path forward to a world where energy has far less environmental impacts, more affordable, and readily available for all.
